TURKEY.

Report from Constantinople—Plague at Djeddah—Plague epidemic on island of Bahrein.

Doctor Post, American representative on the International Sanitary Board, reports, May 22:

The epidemic of plague at Djeddah appears to have stopped suddenly, as is usual with the commencement of very hot weather. The record of the epidemic has been as follows: May 6–11, 13 cases, 12 deaths. Total since January 8, 1907, 365 cases, 350 deaths.

An epidemic of plague is raging at Bahrein, in consequence of which, since May 18, arrivals from Bahrein are subjected to 5 full days' quarantine and strict disinfection, with destruction of rats and mice on board the ships. These measures are executed at some one of the quarantine stations of the Empire.

At a recent meeting of the sanitary board provision was made for the construction of a new supplementary cordon at Camaran. The new construction is expected to be ready for use by the beginning of the next pilgrimage, in August. One hundred and thirteen thousand Ottoman subjects, an unprecedented number, visited Mecca during the pilgrimage just ended.

WEST INDIES.

Plague on island of Trinidad.

Information was received by the Bureau, June 11, from the Department of State, reporting plague, 2 deaths, at Trinidad.

This information was sent on the same date by the Bureau to Chief Quarantine Officer Foster, at San Juan, P. R., Passed Assistant Surgeon Stansfield, at Habana, Cuba, Surgeon White, at New Orleans, La., and to quarantine officers at Atlantic and Gulf ports, the State health officers of Florida, Louisiana, and Texas, and the commissioners of health at Baltimore, Md., and Boston, Mass.
